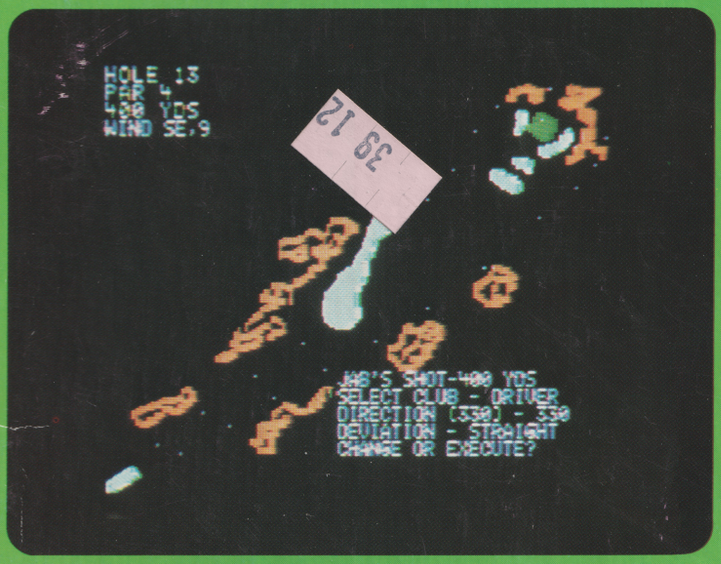
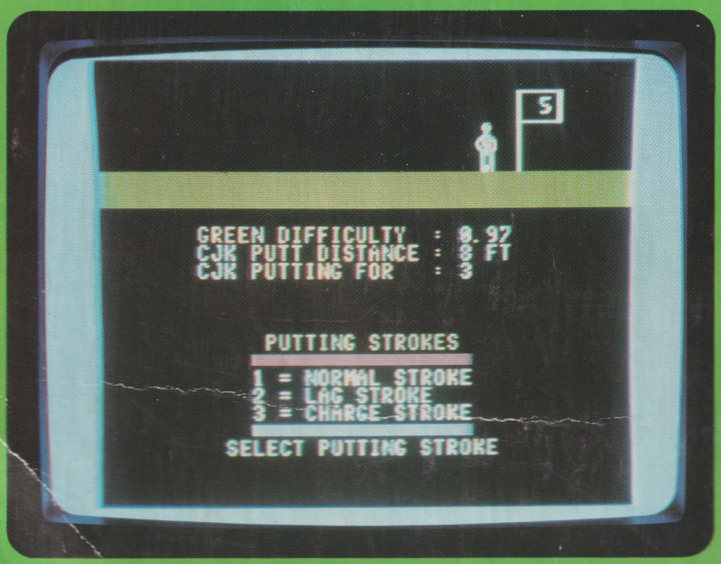
48K APPLE®

For the Apple® II with Applesoft ROM card, II Plus, IIe, & IIc.

Color Hi-Res graphics faithfully recreate hole #6 of famous Pebble Beach. (Commodore 64™ screen display depicted here.)*



Hole #13 of our imaginary golf course that brings together some of the most famous holes from courses around the world. (Apple® version depicted.)*



Putting display. (Commodore 64™ version shown.)*

TREVINO, PALMER, NICKLAUS AND YOU

A fresh Pacific breeze is blowing across the fairways at Pebble Beach, the greens are fast, and the first foursome is ready to tee off: Lee Trevino, Arnold Palmer, Jack Nicklaus...and you.

You're about to play the most challenging computer golf game yet created — a game that brings together the greatest golfers of all time, each playing as he really played, on some of the most formidable holes in the world.

Twenty of the best players of all time have been realistically recreated, each carefully rated according to his power, accuracy and skill, using each type of club in almost every possible situation. You can play against these famous pros, play alone, or let the computer match the Masters against each other and watch the outcome.

If you like, you can even rate your own favorite golfers, including yourself.

PROFESSIONAL TOUR GOLF™ gives you a choice between two different championship courses: the famed seaside course at Pebble Beach, or an imaginary course which our game designer (an avid golfer, if there ever was one) has created. This golfer's fantasy brings together some of the most famous and difficult holes from courses around the world, such as the Augusta National, Merion, and Oakmont.

The high-resolution color graphics give you a bird's-eye view of each hole, showing you every green, bunker, water hazard and tree, and every ball in flight.

You'll choose your club, angle and amount of spin for each drive, and carefully measure your putts. The factors that affect a real game will affect your play, from the velocity of the wind to the difficulty of the green. If you're not careful, your ball can ricochet off a tree, be lost in the rough, or drop into a lake.

The computer acts as scorekeeper, recording not only the game in progress, but the best score of each player on each course in past games, as well as course records.

With one master stroke, we have made every golfer's fondest wishes and dreams come true: To be free from the vagaries of weather, from the curse of terrible partners and from the nuisance of overcrowded courses.

In a very real sense, PROFESSIONAL TOUR GOLF™ puts all the world's best courses *and* players in the palm of your putting hand!

** Screen displays from other computers may vary.*

COMMODORE 64 is a trademark of Commodore Electronics, Ltd.
APPLE is a registered trademark of Apple Computer, Inc.

Made in U.S.A.

- Includes data for 20 professional golfers from the past and present.
- 1 to 4 player options with the computer managing 0 to 4 of the players.
- Each golfer's ratings include: hitting ability, directional accuracy, backspin on ball, consistency, and putting ability.
- Allows players to rate their own golfers, even themselves.
- Two 18-hole courses, each hole with four possible pin positions.
- Complete statistics maintained on all players including number of rounds played, average number of putts per round, average score, best score, and worst score.
- Similar statistics also maintained for each course.

PROFESSIONAL TOUR GOLF™ was designed by **Henry Richbourg**.

☐ **PLAYING TIME: 1 Hour** ☐ **INTRODUCTORY LEVEL**
